

Transition arrangements for students

Griffith University has introduced a new program into OUA which replaces the current **Bachelor of Criminology and Criminal Justice** (BCCJ) program (1384). The pre-2026 program is being taught out over the next three years to allow current students to complete their degree by the end of Study Session 3, 2028.

All continuing students will be able to enrol in courses through to Study Session 3, 2028. However, transitional support will only be offered to students who are enrolled in the BCCJ program prior to the introduction of the new asynchronous program (early 2026). These students should have been notified via email from Griffith University during the last quarter of 2025.

The table on the next page shows the pre-2026 program structure including which subjects are offered in each Study Session. You should use this in conjunction with your existing study plan to work out your path to graduation.

Changes to subjects on offer

All BCCJ subjects in the pre-2026 program have been transitioned from Study Periods (1-4) to Study Sessions (1-3) from Study Session 1, 2026.

Two subjects have been discontinued as of 2026. These are CCJ200 Psychological Explanations of Criminal Behaviour and CCJ207 Sociology of Crime. These two subjects have been replaced by CCJ221 Advanced Criminological Theories. Information about enrolling in these subjects can be found at the bottom of the below table.

Two subjects have been added to the majors list. These are **CCJ336 Neurocriminology** and **CCJ337 Wrongfully Convicted**.

Communication and support

Students who have completed 120CP or fewer in the Pre-2026 BCCJ program over the past 10 years will be contacted. They will receive information about the new program, credit transfer options, the shift to 3 Study Sessions, and the opportunity to complete the current program before its conclusion in Study Session 3, 2028.

The Program Director will provide tailored advice to students wishing to transition, including how existing 10CP courses map to the new 30CP block structure.
