Master of Public Health

In 2014 Curtin University will introduce a new version of the Master of Public Health. Students in the current version will be able to complete their course. Completion may involve minor changes for some students. Some students may be able to transfer to the new version of the course.

The following notes are provided to assist students in the current courses with the minor changes necessary to complete the course.

Students who have passed less than 8 units AND have NOT passed HTHM501 Communication for Health and HTHM805 Ethics in Public Health will be moved to the new version of the course, unless they specifically request to stay in the current version. The structure of the new course can be found at the Course Units tab.

The following units will be withdrawn at the end of 2013

- HTHM805 Ethics in Public Health
- MPH 505 Occupational Diseases
- MPH514 Behaviour Change Communication

The following minor changes are needed as a consequence.

Core Units

In the core units, MPH682 Public Health Response to Climate Change will replace HTHM805 Ethics in Public Health. Students who have passed HTHM805 will have it counted to their degree.

Health Promotion Major

MPH 514 Behaviour Change Communication has been withdrawn. Students should complete the following 6 units:

1. MPH503 Epidemiology
2. MPH510 Health Promotion Methods
3. MPH511 Health Promotion Media and Advocacy
4. MPH512 Nutrition Promotion (coming in 2015)
5. MPH513 Evaluation of Health Promotion
6. MPH515 Health Partnerships, Politics and Power.

Environmental Health Major

MPH505 Occupational Diseases has been withdrawn. If students have passed MPH505 it will be counted in their degree. Students who have not passed MPH505 should complete the following 6 units:

1. INH110 International Health and Primary Care
2. INH180 International Indigenous Health
3. MPH501 Epidemiology of Infectious Diseases
4. MPH508 Sustainable Development for Health
5. MPH509 Health Impact Assessment
6. MPH516 Environmental Health Risk Assessment
**Nutrition Major**

MPH 514 Behaviour Change Communication has been withdrawn. Students should complete the following 4 units plus 2 option units:

1. INH130 International Nutrition
2. MPH503 Epidemiology
3. MPH512 Nutrition Promotion Coming in 2015
4. MPH513 Evaluation of Health Promotion

Choose 2 optional units:

- INH110 International Health and Primary Care
- INH120 Maternal and Child Health in Developing Countries
- MPH511 Health Promotion Media and Advocacy

**Applied Epidemiology and Biostatistics Major**

MPH505 Occupational Diseases has been withdrawn. If students have passed MPH505 it will be counted in their degree. Students who have not passed MPH505 should complete the following 6 units:

1. HTHM701 Research Methods in Health
2. MPH501 Epidemiology of Infectious Diseases
3. MPH502 Control of Infectious Diseases
4. MPH503 Epidemiology
5. HTHM803 Health Planning and Evaluation
6. MPH513 Evaluation of Health Promotion

**Health Policy and Management Major**

This major remains unchanged.

**Research Project**

Double unit will remain unchanged
